The Heating and Ventilating Magazine

INDEX TO VOLUME XVII

1920

NEW YORK

Heating and Ventilating Magazine Co.

1123 Broadway

Advance of gas fuel in the heating industry, David H. Cuyler, Sept., Oct., Nov., Dec.
Advantages and disadvantages of steam and water heating, R. V. Stureman, July.
Air conditions control, division of, established in Chicago, March.
cooling and refrigeration — combination brine and freezing tank using direct expansion ammonia coils, March.
relief arrangement for vapor heating, a new, June.
supply for 4,000 office workers, Nov.
Allen, John R., death of, Nov.
American Society of Heating and Ventilating Engineers.
plans for annual meeting in New York, Jan.
officers nominated for 1920, Jan.
New York Chapter visits St. Bartholomew's Church, Jan.
Illinois Chapter discusses unit heaters, Ja.
Eastern Pennsylvania Chapter hears talk on "Mechanical Stokers," Jan.
Michigan Chapter discusses vapor heating, Jan.
Kansas City Chapter takes up fuel conservation devices, Jan.
Ohio Chapter considers use of sprinkler system piping for a heating system, Jan.
St. Louis Chapter elects officers, Jan.
new president of the society, Dr. E. Vennon Hill, Feb.
society's journal to be issued monthly, Feb.
Illinois Chapter takes up forced water heating, Feb.
Kansas City Chapter learns of warm air furnace research, Feb.
Eastern Pennsylvania Chapter discusses fuel oil and air cleaning, Feb.
report of annual meeting, March.
committee to investigate steam and return main sizes, March.
research work discussed by New York Chapter, March.
Illinois Chapter discusses smoke abatement, March.
announcement of summer meeting, April.
New York Chapter acts on industrial and economic problems, April.
Illinois Chapter boosts research bureau, April.
Minnesota Chapter learns of research bureau plans, April.
annual meeting of Eastern Pennsylvania Chapter, April.
Ohio Chapter discusses anti-corrosion engineering, April.
Kansas City Chapter discusses ozone, May.
New York Chapter elects officers, discusses hot water supply for buildings, May.
talk on vacuum pumps at Illinois Chapter meeting, May.
standard measure of ventilation adopted at St. Louis meeting, June.
report of summer meeting, Juné, Aug.
New York Chapter installs new officers, June.
manufacture of wrought-iron pipe discussed by Illinois Chapter, June.
Eastern Pennsylvania Chapter hears talk on economizers, June.
Michigan Chapter elects new officers, June.
co-operation in building industry discussed by Kansas City Chapter, July.
annual meeting to be held in Philadelphia, Oct.
research bureau's program, Oct.
Michigan Chapter discusses "American Plan of Employment," Nov.
New officers of Illinois Chapter, Nov.
Opening meeting of New York Chapter, Nov.
Western New York Chapter opening meeting, Nov.
Kansas City Chapter's first meeting of the season, Nov.
plans for annual meeting, Dec.
nominations for 1921, Dec.
New York Chapter gets data on chimneys, Dec.
Michigan Chapter pays tribute to Director Allen, Dec.
Kansas City Chapter hears talk on air conditioning, Dec.
Illinois Chapter takes up "Fuel Oil and Fuel Oil Burners," Dec.
Western New York Chapter holds record meeting, Dec.
American Society of Mechanical Engineers, Feb.
Architects movement to improve relations with engineers and the public, Feb.
Argument for the unit system of ventilation as a fuel saver, H. E. Westover, Sept.
Arrangement of connections for expansion tanks of water heating systems, Oct.
Automatic ventilators, recent tests on, A. J. Mack, Oct.
Back to first principles in fuel economy, William La Fontaine, Aug.
Baldwin, William J., possibilities in the use of steam for melting snow, April.
Boiler code for New York State, proposed new, June.
Boiler construction, smokeless, present state of the art in, Sept., Oct., Nov., Dec.
Boiler practice, modern developments in, Dec.
Bonus wage plan proposed for building work, April.
British Institution of Heating and Ventilating Engineers, Jan., May.
Calculations for heating outdoor water tanks, Nov.
Canadian Society of Domestic, Sanitary, and Heating Engineers—report of annual meeting, Aug.
Catechism on safe storage of coal, Sept.
Cathedral, heating system for a modern, Charles L. Hubbard, April, May.
Central heating and lighting plants, standardized, for State institutions, George B. Nichols, Jan.
Central heating rules and regulations, F. A. Tucker, Aug.
Central heating service, the maintenance of supply mains for, F. A. Tucker, Feb.
points on maintaining up-to-date, F. A. Tucker, May.
Central hot water supply in English housing scheme, Oct.
Central station heating rates, plain talk on, D. D. Hayward, Sept.
heating rates, new data on, Dec.
Coal, catechism on safe storage of, Sept.
Coal vs. oil performance chart, C. L. Litchty, Sept.
Coke should be used for domestic heating, how and why, Sept.
Considerations in steam heating main design, F. A. Tucker, Jan.
construction of ducts for forge exhaust and blast systems, Dec.
Correspondence.
chimney data, May.
chimney data sheet 100-I, Oct.
co-ordinating convention dates, July.
discrepancies in heat transmission factors, Nov.
disposal of snow in city streets, June.
effect of number of walls on rate of heat loss, July.
legislation on ventilation of moving picture theatres, Oct.
more data on laundry water heater problem, July.
open window as a fuel waster, July.
problem in laundry water heater, Feb., April.
proper connections for Vento heaters to eliminate air binding, Sept.
radiation loss in uncovered galvanized-iron ducts, Feb.
returning condensation from institutional buildings covering a large area, June.
round ducts and equivalent rectangular ducts, Aug.
snow as an absorber of moisture, April.
symbols for heating terms, July.
tests on automatic ventilators, Dec.
"Cost—Plus Fixed Fee" contract, typical form of, Aug.
Cuyler, David H., the advance of gas fuel in the heating industry, Sept., Oct., Nov., Dec.
Data sheets, plan and specification, for heating and ventilating, Jan., Feb., March, April.
Data sheets standard heating and ventilating.
5-I—computing heat losses—heating and ventilating calculating sheet, July.
109—fittings—standard weight cast-iron screwed fittings, ells, tees, crosses, Nov.
109-A—fittings—standard weight cast-iron screwed fittings, ells, tees, crosses, Nov.
109-B—fittings—standard weight cast-iron screwed fittings, ells, tees, crosses, Nov.
109-C—standard weight screwed fittings, 45° ells, Y's, and reducers, Dec.
109-D—extra-heavy screwed fittings, ells, tees, crosses, Dec.
109-E—extra-heavy screwed fittings, ells, tees, crosses, Dec.
109-F—extra-heavy screwed fittings, Dec.
132-G—vapor heating—the Moline system, Jan.
132-H—vapor heating—the Moline system (concluded), Jan.
132-I—vapor heating—the Webster system, Feb.
132-J—vapor heating—the Webster system (concluded), Feb.
132-K—vapor heating—the Dunham system, March.
132-L—vapor heating—the Dunham system, March.
132-M—vapor heating—the McAlear system, March.
132-N—vapor heating—the McAlear system, March.
132-O—vapor heating—the McAlear system, April.
132-P—vapor heating—the Sterling system, May.
132-Q—vapor heating—the Sterling system, May.
132-R—vapor heating—the Sterling sytsem (concluded), June.
132-S—vapor heating—the Trane system, June.
132-T—vapor heating—the Trane system, July.
132-U—vapor heating—the Trane system (concluded), July.
133—water heating, gravity—general, April.
133-A—water heating, gravity—two-pipe, up-feed system, April.
133-B—water heating, gravity—two-pipe, up-feed system, April.
133-C—water heating, gravity—one-pipe, up-feed system, May.

.A4 I9
v.17
(1920)

133-D—water heating, gravity—down-feed system, May.
133-E—water heating, gravity—down-feed system (concluded), June.
133-F—water heating, gravity—closed tank system, June.
133-G—water heating, gravity—calculations for small systems, July.
133-H—water heating, gravity—one-pipe, down-feed system, Aug.
133-I—water heating, gravity—sizing one-pipe systems, Aug.
133-J—water heating, gravity—sizing one-pipe systems (concluded), Aug.
133-K—water heating, gravity—capacity of risers, Aug.
133-L—water heating, gravity—two-pipe circuit system, Sept.
133-M—water heating, gravity—expansion tanks, Sept.
133-N—water heating, gravity—details, Sept.
133-O—water heating, gravity—details, Sept.
168-B—drives, belt—rules for computing, Jan.
168-C—drives, belt—arc of contact, Jan.
168-D—drives, belt—rules for calculating pulleys, Feb.
170—chemical laboratories—exhaust ventilation, Feb.
172—steam laundries—general, Oct.
172-A—steam laundries—hot water supply, April.
172-B—steam laundries, boilers, Oct.
172-C—steam laundries—typical arrangement, Oct.
172-D—steam laundries—data for laundry apparatus, Nov.
Dehydrating food, new method of, March.
Design and operation of reversing dampers for theatre ventilation, Aug.
Ducts for forge exhaust and blast systems, the construction of, Dec.
East Camp, naval operating base, Hampton Roads, Va., heating system of, Feb.
East Side High School, Cincinnati, Ohio, mechanical equipment of the, Charles F. Jordan, March, April.
Elimination of noises in heating and ventilating systems, May, June, July, Aug.
Engineering Council activities, Feb.
Engineering office, time saving for the, Oct.
Engineers, conference of, in Washington, June 3-4, June.
Expansion tanks of water heating systems, arrangement of connections for, Oct.
Explosion in furnace of a heating boiler, a peculiar, Aug.
Fan blast system of heating and ventilating, an improved, Albert R. Klein, July, Aug.
Federated American Engineering Societies, organization of, July.
Forge exhaust and blast systems, the construction of ducts for, Dec.
Form for the testing and inspection of heating plants, a useful, Nov.
Forms for engineering work, May.
French industrial index, a new, June.
"Fresh Air" problem, ozone as the solution of the, Feb.
Fuel economy, look to first principles in, William La Fontaine, Sept.
Fuel oil for office buildings and power plants generally, June.
Functions of the orifice in steam and water heating, S. Homer Woodbridge, Dec.
Gas fuel in the heating industry, the advance of, David H. Cuyler, Sept., Oct., Nov., Dec.
Gas heating and the manufacture of coke ovens and water gas, notes on, Oct.
Hallett, E. S., ozone as the solution of the "fresh air" problem, Feb.
"Hand" of a fan, March.
Hardwood equal to coal in heating value, Nov.
Hayward, D. D. plain talk on central station heating rates, Sept.
Heat losses from radiators, new data on, March.
Heating and Piping Contractors' National Association.
annual convention announcement, March.
report of annual meeting, June, Aug.
new committee on trade relations, Oct.
Heating and lighting plants, standardized central, for State institutions, George H. Nichols, Jan.
Heating and ventilating, an improved fan blast system of, Albert R. Klein, July, Aug.
systems, elimination of noises in, May, June, July, Aug.
plan and specification data sheets, Jan., Feb., March, April.
Heating boilers, gas-fired, the efficiency of, David H. Cuyler, Oct.
domestic, why and how coke should be used for, Sept.
industry, the advance of gas fuel in the, David H. Cuyler, Sept., Oct., Nov., Dec.
outdoor water tanks, calculations for, Nov.
plants, a useful form for the testing and inspection of, Nov.
profession, technical school training for the, James D. Hoffman, July.
rates, central station, plain talk on, D. D. Hayward, Sept.
rates, central station, new data on, Dec.
research work in England, May.
steam and water, advantages and disadvantages, R. V. Sturcman, July.
steam and water, functions of the orifice in, S. Homer Woodbridge, Dec.
system for a modern cathedral, Charles L. Hubbard, April, May.
system for the new Sing Sing prison, George B. Nichols, Nov.
system for East Camp, naval operating base, Hampton Roads, Va., Feb.
tunnel for Iowa State Capital, Jan.
Hill, E. Vernon, the new measure of ventilation, Aug.
Hoffman, James D., technical school training for the heating profession, July.
Howell, Lloyd, interior piping errors that have caused trouble, Jan.
Hubbard, Charles L., heating system for a modern cathedral, April, May.
Hudson River vehicular tunnel, new plan for, March.
Humidity and fresh air, Aug.
Important work on the science of ventilation, Nov.
Improved fan blast system of heating and ventilating, Albert R. Klein, July, Aug.
Income tax law, personal, New York State, Jan.
Industrial peace in the building trades, Nov.
Inspection of heating plants, a useful form for the testing and, Nov.
Interior piping errors that have caused trouble, Lloyd Howell, Jan.
Jordan, Charles F., mechanical equipment of the East Side High School, Cincinnati, Ohio, March, April.
Klein, Albert R., an improved fan blast system of heating and ventilating, July, Aug.
La Fontaine, William, back to first principles in fuel economy, Sept.
Legal decisions.
amount of recovery on heating contract—acceptance by owner, June.
basis for increase in rates, June.
breach of oral agreement to furnish tenant with heat, June.
bricked-in furnace and heating pipes become part of realty, Aug.
central station water heating rates, Aug.
city not bound by an unauthorized order for material, Oct.
company cannot give rebate because meter is defective, Oct.
construction of covenant to heat leased offices, Feb.
contractor's right to rescind contract for installing heating and ventilating system on prevention of performance by owner, April.
custom and usage of trades and express contracts, Oct.
damages for failure to heat, April.
depreciation—return—apportionment, Aug.
effect of clause in installation contract requiring written order of architects for extras, Aug.
evidence in action for breach of contract to install heating plant showing no damage, Dec.
heating contractor generally an independent contract or not a servant of owner, April.
heating items not included in specifications, April.
increase in rates—depreciation, Jan.
increases in rates—monthly bills, June.
inspection of low-pressure steam heating plants in Minnesota, Oct.
lien for heating plant material, Jan.
necessity or non-necessity for tests of apparatus sold, Dec.
lessor's obligation to install central heat where plant fails, Dec.
recovery for heating and ventilating apparatus installed in states other than place of contract, May.
regulation of heating rates by cities in Iowa, Dec.
service charges—excess equipment, May.
ing heating and ventilating plant under contracts in excess of debt limit, March.
seasonal heating charges, May.
seasonal minimum monthly charges, Jan.
service charges—excass equipment, May.
thermal quality of gas for heating, Aug.
uniform contract for heating and plumbing installation—final certificate—written order for extras, Aug.
value of heating materials installed, April.
warranty of heating plant, if any, must be between parties to contract, March.
water heating rates—surcharge, Jan.
Lichty, C. L., coal vs. oil performance chart, Sept.
Lives six days in a sealed glass case, Sept.
Mack, A. J., recent tests on automatic ventilators, Oct.
Maintenance of supply mains for central heating service, F. A. Tucker, Feb.
Making an old heating system efficient, Feb.
Massachusetts Institute of Technology co-operates with industry, March.
Measure of ventilation, the new, E. Vernon Hill, Aug.
Measuring air velocities, the problem of, July.
Mechanical equipment of the East Side High School, Cincinnati, Ohio, Charles F. Jordan, March, April.
Methods of erection and controling apparatus for gas heating, David H. Cuyler, Nov.
Michigan law governing installation of warm air furnaces, Aug.
Modern developments in boiler practice, Dec.
Moistening room air, new method of, June.
National association of master plumbers, annual convention, Aug.
National District Heating Association.
annual convention announcement, April.
report of annual meeting, June, July.
National Warm Air Heating and Ventilating Association, report of annual meeting, June.
New data on heat losses from radiators, March.
data on central station heating rates, Dec.
form of psychrometric chart, Oct.
measure of ventilation, E. Vernon Hill, Aug.
method of moistening room air, June.
New publications.
ninth annual report by the director of the Bureau of Mines, Jan.
third annual report of the United States Council of Defense, Jan.
colloidal fuel, Feb.
industrial fuels, Feb.
instant calculator, Feb.
report of progress in warm air furnace research, Feb.
emissivity of heat from various surfaces, May.
technical writing, May.
trade and allied associations and publications in New York City, classified, May.
proceedings of the American Society of Heating and Ventilating Engineers, Aug.
final report of the fuel controller of Canada, Sept.
tin, sheet iron, and copper plate worker, Sept.
engineering index, Oct.
financial engineering, Oct.
handbook of architectural practice, Oct.
how to make and use graphic charts, Oct.
psychro book, Oct.
sources of our exports, Oct.
concrete houses, how they are built, Nov.
bituminous coal storage practice, Nov.
Newark (N. J.) adopts heating ordinance, July.
New York State personal income tax law, Eugene M. Travis, Jan.
Nichols, George B., heating system for the new Sing Sing prison, Nov.
standardized central heating and lighting plants for State institutions, Jan.
Noises in heating and ventilating systems, elimination of, May, June, July, Aug.
Notes on gas heating and the manufacture of coke ovens and water gas, Oct.
Orifice in steam and water heating, functions of the, S. Homer Woodbridge, Dec.
Outdoor water tanks, calculations for heating, Nov.
Ozone as the solution of the "fresh air" problem, E. S. Hallett, Feb.
Performance chart, coal vs. oil, L. C. Lichty, Sept.
Piping erorrs, interior, that have caused trouble,
Plan and specification data sheets for heating Jan.
and ventilating, Jan., Feb., March, April.
Plain talk on central station heating rates, D. D. Hayward, Sept.
Points on maintaining up-to-date central heating service, F. A. Tucker, May.
Poor ventilation kills appetite, Jan.
Possibilities in the use of steam for melting snow, William J. Baldwin, April.
Present state of the art in smokeless boiler construction, Sept., Oct., Nov., Dec.
Prison, heating system for the new Sing Sing, George B. Nichols, Nov.
Professional engineers must be registered in Oregon, Jan.
Psychrometric chart, new form of, Oct.
Public Works Department Questionnaire, Dec.
Pump room, a well-arranged, Oct.
Questionnaire Public Works Department, Dec.
Recent practical measures taken by engineers to meet the industrial crisis, Feb.
Recent tests on automatic ventilators, A. J. Mack, Oct.
Reconstruction and production problems, special Senate committee at work on, July.
Referendum on principles of industrial relations, United States Chamber of Commerce takes, July.
Refrigerating plants, proposed code for installing and operating, March.
Reversing dampers for theatre ventilation, design and operation of, Aug.
Rules and regulations, central heating, F. A. Tucker, Aug.
Safe storage of coal, catechism on, Sept.
Salaries, engineers' schedule of, Feb.
Science of ventilation, important work on the, Nov.
Sheet asbestos on hot air pipes, the value of, Jan., April.
Sing Sing prison, heating system for the new, George B. Nichols, Nov.
Smoke Prevention Association, report of the annual meeting, Nov.
Smoke problem of Salt Lake City, sulphur dioxide as a factor in the, Sept.
Smokeless boiler construction, present state of the art in, Sept., Oct., Nov., Dec.
Soft coal, suggestions on storage and hand-firing of, Sept.
Standard conditions adopted by heating contractors to form part of proposal, April.

safety codes, formulation of, under way affecting all industries, Feb.
Standardized central heating and lighting plants for State institutions, George B. Nichols, Jan.
Steam and water heating, advantages and disadvantages of, R. V. Stureman, July.
for melting snow, possibilities in the use of, William J. Baldwin, April.
heating main design, considerations in, F. A. Tucker, Jan.
trap, new idea for a, June.
Storage and hand-firing of soft coal, suggestions on, Sept.
Structural service bureau, organization of, July.
Stureman, R. V., advantages and disadvantages of steam and water heating, July.
Suggestions for solving the construction problem, Nov.
on storage and hand-firing of soft coal, Sept.
Sulphur dioxide as a factor in the smoke problem of Salt Lake City, Sept.
Super-power stations on Atlantic sea-board, progress of movement to establish, Oct.
Supply mains for central heating service, the maintenance of, F. A. Tucker, Feb.
Supplying moisture to the air, March.
Tanks, outdoor water, calculations for heating, Nov.
Technical school training for the heating profession, James D. Hoffman, July.
Test coal ashes in New York City, Nov.
Testing and inspection of heating plants, a useful form for, Nov.
Theatre ventilation, design and operation of reversing dampers for, Aug.
Time saving for the engineering office, Oct.
Trade Extension Bureau.
suggestion for heating contractor's show window, Feb.
directory of plumbing and heating contractors, April.
future plans, April.
new bulletins on estimating, contracting, and accounting, April.
store of the heating contractor, May.
business building suggestions for the heating contractor, June.
membership monogram, June.
new form of "cost-plus" contract, June.
field men to call on heating and plumbing contractors, Aug.
accounting the big problem in the contracting field, Oct.
conditions found in one of the large cities, Oct.
information wanted on workmen's compensation insurance, Oct.
nation-wide information campaign on business management, Oct.
systematizing the heating contractor's desk, Nov.
getting down to facts on fixed charges, Dec.
representatives "on the road," Dec.
Training, technical school, for the heating profession, James D. Hoffman, July.
Travis, Eugene M., New York State personal income tax law, Jan.
Tucker, F. A., considerations in steam heating main design, Jan.
the maintenance of supply mains for central heating service, Feb.
points on maintaining up-to-date central heating service, May.
central heating rules and regulations, Aug.
Unit system of ventilation as a fuel saver, argument for the, H. E. Westover, Sept.
Useful form for the testing and inspection of heating plants, Nov.
Vapor heating, a new air relief arrangement for, June.
Vapor heating, modern practice in.
XVIII—the Bishop and Babcock vacuvapor system, Jan.
XIX—the Richardson vapor-vacuum-pressure system, Feb.
XXI—the Sterling vapor system, April.
XXII—the Doody system, May.
XXIII—the Economy system, June.
XXIV—the O-E Perfect system, July.
XXV—the Illinois system, Aug., Sept.
XXVI—the Crescent Economic system, Sept.
Ventilation, argument for the unit system as a fuel saver, H. E. Westover, Sept.
science of, important work on the, Nov.
the new measure of, E. Vernon Hill, Aug.
Ventilators, automatic, recent tests on, A. J. Mack, Oct.
Water heating systems, arrangement of connections for expansion tanks of, Oct.
Weather charts for New York, Boston, Pittsburgh, Chicago, and St. Louis, Nov., Dec., 1919, Jan., Feb., March, April, Oct., 1920.
Westover, H. E., the argument for the unit system of ventilation as a fuel saver, Sept.
What the open window does to the coal bill, June.
When will building costs be lowered, Nov.
Why and how coke should be used for domestic heating, Sept.
Woodbridge, S. Homer, functions of the orifice in steam and water heating, Dec.
Wrinkles.
arrangement of gas burners under boilers, Oct.
arrangement and direction of concealed pipes, how to determine, Aug.
arrangement of fans and dampers permitting flexibility of heating system in accordance with weather conditions or repairs to the system, Nov.
boiler compound injector made of pipe fittings, Dec.
circulation of water against the flow of steam, April.
comparative fuel economies effected by automatic temperature regulation and manual control with divided radiation, Sept.
connecting radiators below the flow main of gravity water heating systems, method of, Aug.
connecting returns to one or more boilers without check valves, a method of, June.
conservation of hot drips and their value as compared with exhaust steam, Sept.
convenient method of filing meter records and plant piping diagrams, Dec.
correct use of thermometers, Aug.
eliminating a separate drip from a pocket in a steam main by draining through a pipe coil, Nov.
eliminating dust with wet fan blades, July.
emergency gasket of lead, Oct.
fan blast heating of shops, design of discharge outlets and diffusers in, April.
fan blast heating, miscellaneous details, May.
fan blast heating sets, care and operation of, March.
firing tools, proper design of, Aug.
how to obtain a true sample of boiler feed water for laboratory analysis, Dec.
how to make pipe bushings out of standard pipe, Dec.
improving the efficiency of heating systems, Feb.
maintenance or guarantee sign for contract for work, Oct. Dec.
method of insulating and heating exposed water lines to prevent freezing, Oct.
natural ventilation in photometric rooms to admit air while shutting out light, Jan.
notes on accelerating coils, Feb.
piping connections for automatic control of boiler feed pumps, Nov.
portable home-made erasing machine for the drafting room, June.
proper application and use of leather belting, March.
protection and insulation of underground steam mains, Feb.
providing access to important valves, Oct.
radiator, how to get the most heat out of a, April.
returning condensation from institutional groups of buildings covering a large area, March (see June)
selection and mounting of recording instruments, Nov.
some of the things a layman can do to a heating system, June.
standard method of pipe connections for maximum economy, Oct.
various methods of supporting and protecting pipes, Dec.
heating system, June.
standard method of pipe connections for maximum economy, Oct.
